

# Langeland Ziekenhuis Hospital

Zoetermeer - Netherlands

## PROJECT

Facing financial problems and a threat of closure, the hospital's staff sprang into action in a bid to raise funds and forge partnerships with other hospitals in the area. Work then began at the hospital, so that staff could continue providing a full range of high-quality care services to the city's inhabitants. Saint-Gobain Eurocoustic took part in the project by renovating the hospital's ceilings.

## CUSTOMER REQUIREMENTS

- Stylish design
- Acoustic comfort
- Hygiene

## OUR SOLUTION

Clini'Safe® A15 tiles to provide the hygiene and acoustic absorption that patients need, while meeting the requirements of the applicable fire safety standards for this type of building.

## CLINI'SAFE® A15

- These rigid stonewool self-supporting panels are ideal for healthcare facilities and are reinforced with a natural glass fiber veil on the reverse side.
- Clini'Safe® tiles do not pollute the room's air, prevent bacteria from developing and are highly resistant to humidity thanks to the intrinsic qualities of Eurocoustic stonewool. Ceilings stay spotless and are easy to clean.

## PRODUCT BENEFITS

- Tested on the three criteria of the French Health Standard NF S90-351: 2013
- Cleaning: five cleaning methods
- Acoustic absorption:  $\alpha_w = 0,90$
- Fire reaction: A1
- Resistance to humidity: no sagging regardless of the moisture content
- Painted edges and visible face
- High-density panel
